ABOUT ME

Full-stack software engineer with experience building enterprise CRM, billing, and marketing systems. Known for working closely with business stakeholders and product teams to identify pain points and deliver software solutions that optimize real-world processes. Skilled in PHP, React, JavaScript, SQL, and Docker with a strong foundation in agile development and the full SDLC.

PHP, OOP Designs, React, Redux, JavaScript, SQL, Docker, Git, SDLC, Docker, Java, C, C#, AWS, React, UI/UX Design, Responsive Front-end Development, Python, Bash, Git, Data Structures, Object Oriented Programming, Application Development, Unity, Game Development

EXPERIENCE & PROJECTS

Software Engineer

Nov. 2024 – May. 2026

Paycom

- Used PHP to build backend advanced endpoints
- Meeting with our CRM and billing users to come up with features that will provide value to our business
- Write and optimize SQL queries that can handle business demand
- Worked on ETL jobs to extract millions of data every night without slowing down our systems
- Utilized Javascript, React Redux, and other tools to develop responsive frontend designed for user experience
- Grow my skills in SDLC
- Strengthen skills on other tools like Git, Docker and C#

Computer Science Tutor

Sept. 2023 – May. 2024

The University of Texas at San Antonio

San Antonio, Texas

- Taught and guided others in subjects regarding Computer Science.
- Analyzed code written by other people and thoroughly explained logical or compilation errors.
- Debugging code and evaluating the logical reasoning behind algorithms implemented by clients.
- Clarified and refined instructions for clients for better understanding.

Web Developer

Aug. 2024 – Sept. 2024

Rep Lock Marketing

Austin, Texas

- Applied my UI/UX skills to design and build responsive and user-friendly web sites
- Implemented techniques and strategies to make website more Search Engine Optimized
- Used HTML, CSS and JavaScript to build websites for clients
- Used WordPress

PHOTOGRAPHY WEBSITE [[Source Code](#)]

PHP, HTML, CSS, AWS Bootstrap, MySQL

- Engineered a web application to provide photographers with a user-friendly interface to publish their work.
- Strengthened my skills in UI/UX design by creating wireframes and sketches using Figma
- Designed and managed an SQL database for user information, photos, orders, etc.
- Strengthened my skills in full stack Web Development by utilizing PHP, HTML, CSS, AWS, Bootstrap and MySQL

CPU CACHE SIMULATOR [[Source Code](#)]

C programming, Data Structures, Fundamentals of Computer Architecture, Low-Level Programming

- Engineered and developed a CPU cache simulator, shows my skills in C programming as well as knowledge in data structures.
- Enhanced my skills in low-level programming
- Underwent intensive software testing using sophisticated test cases.

CPU FIGHTERS GAME [[Source Code](#)]

C#, .NET, Unity, State machine

- Developed a fully functional fighting game with a good UI and bug free user experience.
- Engineered an advanced and optimized AI state machine that makes decisions for the AI fighter.
- Utilized C#, Unity and .NET

EDUCATION

University of Texas at Austin

Aug 2026 - Present

MS, Computer Science

Online

- Coursework – Distributed Systems, Deep Learning

University of Texas at San Antonio

Aug 2022 - May 2024

BS, Computer Science

1 UTSA Circle, San

Antonio, TX 78249

- UTSA GPA: 3.85
- *Magna Cum Laude*
- Coursework – Data Structures, Cloud Computing, Analysis of Algorithms, Web Technology, Database Management Systems, Application Programming, Operating Systems
